

DIAREX® QUICK PROFILE VACUUM BRAZED EDGE PROFILING TOOLS

Quick Profile Tools makes professional edge shaping simple for tilers and DIY trades. Designed for use with any standard M14 angle grinder, it brings workshop-quality profiling directly to the job site, without the need for heavy machinery. This product has been developed through extensive field testing with tilers and fabricators.

Key Features:

- A fully plated steel body delivers durability and extended tool life.
- A steel guide with an integrated bearing and tracer system accurately follows the stone edge for consistent, flat profiles and seamless replication.

SPECIFICATIONS

Material	Natural stone, porcelain, & silica-free engineered stone.
Size/Material thickness	Series A – 10/20mm Series B – 10/20/30/40mm Series F – 10/20/30/40mm Series V – 10/20/30/40mm
Thread size and type	M14
Maximum RPM	10,000 RPM

Series:

- Creates smooth rotation and consistent profiles with precision bearings that reduce vibration.
- High-strength vacuum brazed diamond technology delivers fast cutting, efficient shaping, and long-lasting sharpness.
