

kerakoll

Aquastop 120 is a flexible NBR waterproof joint for continuous sealing across perimeter and expansion joints. Ideal under ceramic, porcelain, and stone tiles, it ensures reliable protection and bonds directly for quick, easy installation.

Aquastop 120

Flexible nbr waterproof joint

Key Features:

- Flexible and Alkali-Resistant: Maintains elasticity and durability in harsh alkaline environment.
- Flexible and Alkali-Resistant: Maintains elasticity and durability in harsh alkaline environment.
- Flexible and Alkali-Resistant: Maintains elasticity and durability in harsh alkaline environment.
- Flexible and Alkali-Resistant: Maintains elasticity and durability in harsh alkaline environment.

VOC Ratings / Eco Notes

- Very Low VOC
- Recyclable

Certifications / Ratings

- GreenBuilding Rating 3
- ISO 9001 / 14001 / 45001
- Available in 50m rolls

Tensile strength	> 4.19.4 N/mm
Elongation	up to 230%
Pressure resistance	3 bar
Vapour Permeability	8400

Warning: Protect from frost and heat. Avoid use on highly deformable, damp, or reactive substrates. Dilution guidance varies by substrate.
