kerakoll

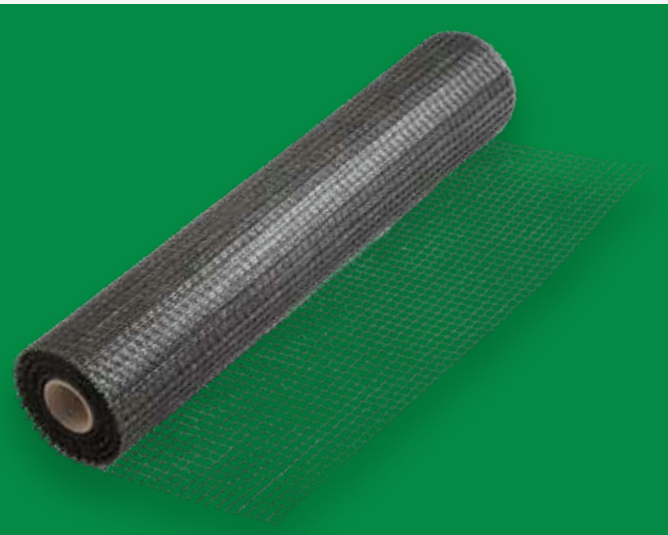

Aquastop AR1 is an alkali-resistant fibreglass mesh that reinforces waterproof membranes like Nanoflex and Aquastop Flex. It enhances strength, crack resistance, and ensures even membrane thickness for long-term durability.

# Aquastop Ar1

## Alkali-resistant reinforcing mesh

Key Features:

- Superior mesh quality for reliable reinforcement
- High tensile and shear strength
- No memory effect, lays flat for easy installation
- Improves application control and membrane coverage
- Enhances mechanical performance and crack resistance
- Ideal for wall and floor applications

Certifciations / Ratings

- ISO 9001 / 45001 Certified

Available in 50 m rolls

| | |
|---|---|
| **Mesh:** | 10×10 mm |
| **Roll:** | 50 m × 1 m |
| **Weight:** | 110 g/m² (primed) |
| **Elongation (warp/weft):** | 1,450 N/5cm ±1% |
| **Appearance:** | Glass fibre |

**Warning:** Professional use only. Does not require SDS. Follow joint detailing and embed fully in wet membrane.
