

kerakoll

Aquastop Flangia is a flexible NBR seal for waterproofing around pipes and drains before tiling. Applied with cold bonding, it ensures continuous protection around outlets and penetrations.

Aquastop Flangia

Elastic NBR Seal

Key Features:

- Breathable, Alkali-Resistant Core: Designed to withstand basic environments while allowing vapour diffusion.
- Cold Bonded Installation: Easy to apply without heat, simply embed in waterproofing membranes.
- Internal & External Use: Versatile performance across bathrooms, balconies, terraces, and other wet areas.

Certifications / Ratings

- GreenBuilding Manual
- ISO 9001 / 14001 / 45001

Available in:

- Wall: 20 pcs/box
- Floor: 10 pcs/box

Dimensions: 120×120 mm (wall), 350×350 mm (floor)
Working range: -40°C to +100°C
Thickness: 0.6 to 0.8 mm

Warning: Professional use only. Follow system detailing and embed fully into the waterproofing membrane.
