

## SK3

### Cementitious Patching Compound

#### Key Features:

- Internal Use
- High bond and adhesion strength to timber, concrete, ceramic tiles, terrazzo and quarry tiles without priming
- Can be feather edged down to extremely fine repairs due to nature of fine fillers used
- High coverage rate achievable
- One component – simply add water and mix

|               |                                        |
|---------------|----------------------------------------|
| Coverage:     | 3 m <sup>2</sup> per kg (per 20kg bag) |
| Thickness:    | Feather to 3 mm                        |
| Water:        | 1.75 – 2 Litres                        |
| Work time:    | 10 min                                 |
| Foot Traffic: | 2 – 3 Hours                            |
| Overlay:      | 15 Min                                 |

|                   |                       |
|-------------------|-----------------------|
| Application Temp: | 10 – 30°C             |
| Clean Up:         | Water                 |
| VOC Rating:       | <1 g/L (US RULE 1168) |
| Bag Size:         | 5kg                   |

**Warning:** Professional use only. Follow recommended mixing ratios and application guidelines.
